Editor's Note

Dear J Tribe Members,

As the air buzzes with the excitement of Ganeshotsav, I extend my warmest wishes for a joyful and blessed celebration to all our JTribe members and their families. We were honored to welcome Bappa at our Head Office and all Sales and Site offices on Ganesh Chaturthi, praying for strength and well-being for everyone. This month marks a significant milestone for us. On August 14th, we celebrated our 40th Annual Day, a special day that coincides with our esteemed chairman's birthday. This occasion allows us to reflect on the core values—Trust, Commitment, and Quality—that have been instrumental in building Jhamtani into a brand you can rely on.

We are thrilled to announce a major step forward with the inauguration of our new sales office in Mundhwa. This office is dedicated to our upcoming ultra-premium 3 and 4 BHK project, a part of our exclusive XO series. This series is designed to offer a new standard of luxury and value for homeowners, elevating their lifestyle with thoughtfully crafted spaces and superior amenities. This project also marks our fourth development in Mundhwa, a location that continues to show remarkable growth. Mundhwa offers excellent connectivity, a rapidly expanding infrastructure, and has become a hub for most

premium real estate brands, ensuring a high potential for value appreciation.

In addition to

this, we have also inaugurated a sales office at Kokane Chowk, Pimple Saudagar, for an upcoming commercial project at this premium location. We are working diligently to secure all necessary approvals, and sales will begin as soon as they are in place.

Your continuous support and contribution have been the foundation of our success, and for that, we are immensely grateful. It is your trust that motivates us to continuously strive for excellence and build a brand that stands for reliability and quality. For more information, please visit www.jhamtani.com.

Warm regards,

Meenakshi Jhamtani

Spreading Positivity & Prosperity with Ganpati Bappa at Office

Our workplace came alive with devotion as each department hosted Ganpati Puja over 10 days. From creative decorations to soulful aartis, every team added their unique touch. The celebrations brought us together in joy, faith, and unity, filling the office with Bappa's blessings of wisdom and prosperity.

Ganesh Sthapana at HO

A Legacy of Excellence: Honoring Our Founder on Foundation Day

August 14th holds special significance for our organization, as we celebrate both Foundation Day and the **birthday** of **Shri Parmanand Jhamtani**, our visionary founder who laid the groundwork for our enduring success. This remarkable occasion offers us a chance to reflect on our journey to a leader whose principles continue to inspire our mission.

Shri Parmanand Jhamtani's leadership is deeply rooted in integrity, commitment to quality, and a drive for innovation. He envisioned not just the building of a vast business empire but the creation of a lasting legacy founded on trust, excellence, and social responsibility. His focus on hard work and the importance of building meaningful relationships within our industry and community has shaped our company culture and had a positive impact in the areas we serve. As we celebrate his birthday, we all express our heartfelt gratitude for his visionary foresight and mentorship, which guide us on our path forward.

Foundation Day is a moment of collective pride as we commemorate our evolution from Shri Jhamtani's humble beginnings to a respected force within the industry and beyond. Each of our achievements—ranging from expanding our diverse product lines and earning industry awards to reaching record-high customer satisfaction—reflects the relentless dedication and passion of our employees. Their commitment to upholding our founder's values has been key to driving our continuous growth throughout the years.

Looking ahead, the legacy of Shri Parmanand Jhamtani shines as our guiding light. His principles of unmatched quality, integrity in all dealings, and an unwavering commitment to customer-centricity are the foundation of our strategic vision as we adapt to the changing landscape of our industry.

To mark this remarkable day, we warmly invited all employees, partners, stakeholders, and

well-wishers to join us in a celebration filled with festive activities, inspiring tributes, and heartfelt acknowledgments. The event featured speeches from key executives, testimonials from long-serving employees, and engaging activities designed to strengthen our bonds and renew our commitment to our core values. Together, we celebrated the vision and principles that united us while honoring Shri Parmanand Jhamtani, whose dreams and aspirations significantly shaped our organization's journey.

Together, we celebrated our rich history and united to shape a brighter future full of promise and potential!

Mr. Shubham Sonawane
Asst. Manager - ADMIN

A Proud Beginning: Ace Abode's First Independence Day Celebration

As the morning sun rose on 15th August, the air at Ace Abode was filled with something truly special—pride, unity, and the unmistakable spirit of patriotism. For me, as the RnL Programme Executive at Jhamtani, this wasn't just another event. It was a moment of deep emotion and fulfillment. Ace Abode is one of our recently delivered projects, and watching its residents come together to celebrate their first Independence Day in their own society felt like witnessing a dream come to life.

A Morning to Remember

The celebration began with a graceful flag hoisting ceremony, led by our esteemed Chief Guests, Mr. Anup Jhamtani and Mrs. Meenakshi Jhamtani. Their presence brought a sense of honor and warmth to the gathering. As the tricolor unfurled and the national anthem echoed through the courtyard, I looked around and saw faces lit with pride—children standing tall, elders with folded hands, and families united in reverence. It was more than just a ceremony; it was a shared heartbeat.

Little Hands, Big Dreams

One of the most touching parts of the day was the drawing competition for the children. These young artists poured their hearts into their creations—sketching flags, freedom fighters, and scenes of unity with vibrant colors and innocent imagination. Their enthusiasm was infectious. We handed out small prizes, but the real reward was the joy and pride on their faces. It reminded me why we do what we do—not just to build homes, but to nurture communities.

Conversations Over Chai

After the activities, residents gathered over snacks and warm conversations. Laughter echoed, new friendships were formed, and neighbors became friends. It was beautiful to see people from both A and B Wings mingling, sharing stories, and celebrating together. The sense of belonging was palpable, and I felt grateful to be part of this journey.

Behind the Scenes Heroes

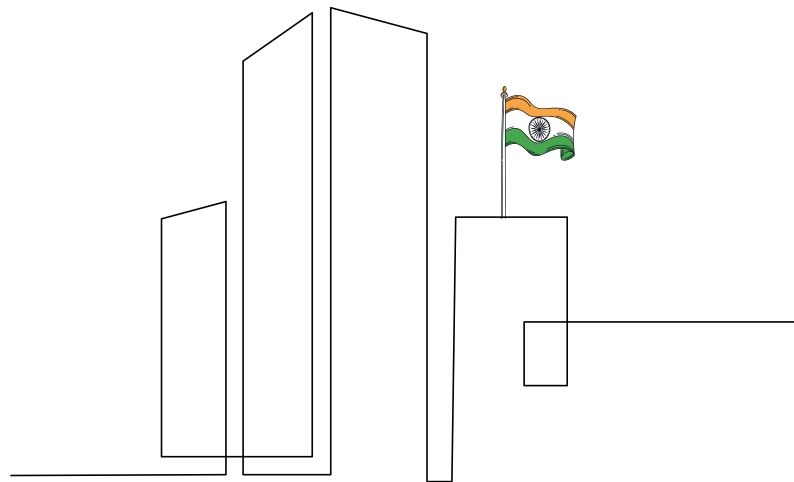

A heartfelt thank you to Mr. Shubham Sonwane Sir (Admin), our dedicated CRM Team, and the HAS Team. Their tireless efforts and seamless coordination ensured everything ran smoothly. From setting up the venue to managing logistics, they worked quietly behind the scenes to make this day perfect. I'm proud to work alongside such passionate individuals.

A New Chapter Begins

This celebration wasn't just about commemorating our nation's freedom—it was about marking the beginning of a new chapter for Ace Abode. It was the first of many memories that will be created here. As I stood among the residents, I felt a deep sense of pride—not just in the event, but in the community we've helped build.

To every resident who joined us, thank you for your spirit, your smiles, and your warmth. You've made Ace Abode more than a project—you've made it a home.

Jai Hind

Ms. Aparna Jawanjali
Pre-sales Executive

Chai Pe Charcha – Welcoming Our New Joiners

This month, we had the pleasure of hosting our Induction and Orientation Session for new joiners in a warm and engaging format – Chai Pe Charcha with our management team.

The session was initiated by Anup Sir, who set the tone by introducing himself and encouraging each new team member to share

their introduction along with their immediate goals and the role they will be playing in our organization. This not only helped break the ice but also created a sense of belonging from the very beginning.

As the introductions unfolded, discussions naturally branched into finer details of our

ongoing projects, giving the new joiners valuable insights into our current priorities and direction.

The session also featured an open forum Q&A, where the newcomers were free to ask questions, share their perspectives, and seek guidance. The exchange was both informative and inspiring.

Key Takeaways from the session included:

- The importance of Time Management in personal and professional growth.
- How to Handle Failures and turn them into learning opportunities.

The orientation concluded on a refreshing note with a cup of chai, laughter, and meaningful conversations – a perfect blend of warmth and knowledge sharing.

Chai Pe Charcha truly lived up to its essence: a platform to connect, learn, and grow together.

A Warm Welcome to Our New Joiners

We are delighted to welcome our newest team members on board. Your fresh perspectives, energy, and enthusiasm will surely add great

value to our organization. We look forward to working together and achieving many milestones as a team.

Ms. Yugandhara Jadhav
Assistant Manager - HR

A Double Celebration of Excellence

📍 Ace Abundance, Mundhwa

📍 Jhamtani Bizone, Rahatani Pimple Saudagar

We are proud to unveil not one, but two Experience Centres that redefine the future of living and business. At Mundhwa, we present Ace Abundance, our flagship in the XO Signature Series, where luxury living meets iconic design, while at Kokane Chowk, Pimple Saudagar, we introduce Jhamtani Bizone, the upcoming benchmark in business and commercial excellence. More than just spaces, these centres are immersive journeys into our vision of thoughtful design, future-ready innovation, and unmatched quality — setting new standards for

how you live, work, and experience excellence.

Both landmarks are soon going to be launched in the market with a 360° media plan, ensuring their presence resonates across every touchpoint.

Mr. Kulvinder Singh
General Manager Marketing

A Proactive Step Towards Wellness: Health Check-up Camp Organized at HO

In a world where the pace of life often leaves little room for personal well-being, the importance of proactive healthcare cannot be overstated. Recognizing this, the Head Office (HO) recently took a significant step towards fostering a culture of health and wellness by organizing a comprehensive health check-up camp for all employees.

Held on 16 August 2025, the camp was a resounding success, drawing enthusiastic participation from staff members across all departments. The initiative aimed to provide a convenient and accessible platform for employees to get a snapshot of their health status, identify potential risks, and receive valuable medical advice.

The camp offered a wide range of diagnostic services, including:

- **General Health Screening:** This included measurements of blood pressure, blood sugar, & BMI (Body Mass Index), which are crucial indicators of overall health.
- **Eye and Dental Check-ups:** Specialized professionals conducted screenings for vision and dental health, addressing two of the most commonly neglected aspects of personal care.

The success of the health check-up camp at HO is a testament to the organization's commitment to its employees' welfare. It's a powerful statement that a healthy workforce is a happy and productive workforce. This initiative serves as a model for other organizations, demonstrating that investing in employee health is not just a cost but a valuable investment in the future of the company.

As the camp concluded, it left behind a positive ripple effect. It has not only encouraged employees to be more mindful of their health but also reinforced the sense of community and care within the organization. The HO looks forward to making such health and wellness initiatives a regular feature, ensuring that its employees continue to thrive, both professionally and personally.

Ms. Reshma Soman
AGM- Administration

CORE HIGHLIGHTS

The Power of Measurement: How Tracking Our Progress Leads to Success

Hey Team,

Have you ever heard the saying, "What gets measured gets done"? It's a simple phrase, but it holds a powerful truth, especially in the world of business and continuous improvement. Today, let's explore this concept with a little story from our own city, Pune.

Imagine a bustling weekend morning in Pune. Our friend, Rohan, decided he wanted to get fitter and run the Pune Marathon next year. He was enthusiastic! For the first few weeks, he'd go for a run whenever he felt like it. Some days he ran for 30 minutes, some days 15, and sometimes, he'd skip it altogether because "life happened." He was trying, but his progress felt... random. He felt good after a run, but couldn't quite tell if he was actually getting closer to his marathon goal.

One day, his friend Priya, a seasoned runner, asked him, "Rohan, how far did you run today? What's your average pace this week?" Rohan shrugged. "I'm not really tracking it," he admitted.

Priya smiled. "Well, how will you know if you're getting better? If you don't measure it, it's hard to improve it. Start tracking your distance, time, and pace. Even better, set a small, measurable goal for each run."

Intrigued, Rohan bought a running watch. He started logging every run. He saw his distance. He saw his pace. He saw how many kilometers he covered in a week. Suddenly, his training transformed!

When he saw he'd only run 10 km in a week, he felt a gentle push to do more in the next. When he saw his pace had slowed, he consciously tried to

pick it up on his next session. He started setting small, achievable targets: "Today, I will run 5 km," or "This week, I will cover 20 km."

Guess what happened?

By consistently measuring his efforts, Rohan became more aware, more accountable, and ultimately, more effective. He started noticing patterns, identifying areas where he could improve, and celebrating his small victories. He wasn't just "running"; he was actively training, with clear milestones. And yes, he successfully ran the Pune Marathon the following year, crossing the finish line with a huge smile!

Bringing it Back to Us

Rohan's story isn't just about running; it's about anything we want to achieve, especially here at Jhamtani. Whether it's:

- **Project Completion:** Tracking our project milestones and deadlines.
- **Customer Satisfaction:** Measuring feedback and response times.
- **Efficiency:** Monitoring how quickly we complete tasks or resolve issues.
- **Skill Development:** Setting goals for learning new tools or techniques.

When we define what success looks like, set clear, measurable goals, and then actively track our progress against those goals, we create a powerful feedback loop. This loop helps us:

- **Stay Focused:** We know what we're aiming for.
- **Identify Gaps:** We see where we might be falling short.
- **Adjust Our Approach:** We can make informed decisions to get back on track.
- **Celebrate Success:** We recognize and appreciate our achievements, big and small.

Just like Rohan needed to see his running stats to improve, we need to see our performance metrics to excel as a team and as individuals. Let's embrace the power of measurement and use it to drive our collective success.

What are you measuring today that will help us achieve our goals tomorrow?

Mr. Chaitanya Panchpor
Head - Human Resources

CORE HIGHLIGHTS

Paryushan – A Festival of Forgiveness and Inner Reflection

In the fast-paced world of today, where life often pulls us in different directions, festivals serve as gentle reminders of our values and purpose. One such occasion, celebrated with deep devotion and reflection in Jainism, is **Paryushan Mahaparva**.

At the heart of this festival lies the universal principle – “**Ahimsa Parmo Dharma**” (Non-violence is the supreme religion). Paryushan is not just a ritual, but a spiritual journey that inspires every individual to look within, to purify thoughts, words, and actions, and to live in harmony with all living beings.

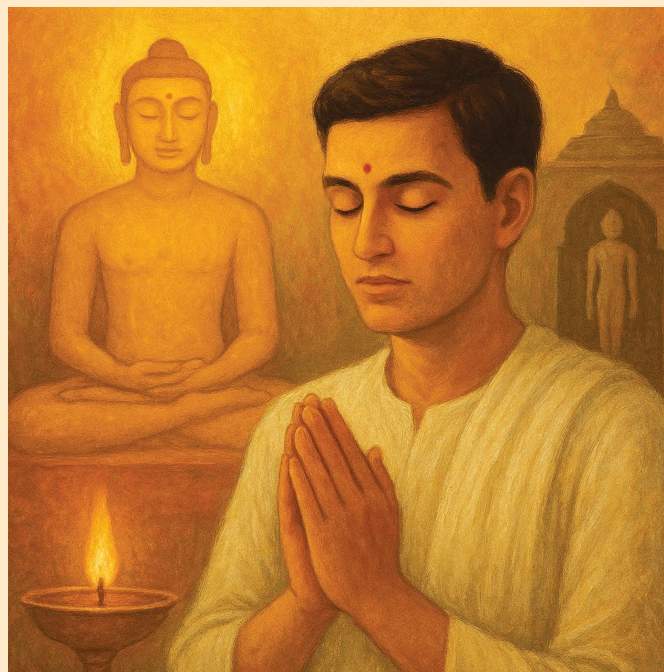

The Essence of Paryushan

Paryushan, observed annually, is a time of self-discipline, meditation, fasting, and seeking forgiveness. It emphasizes the importance of introspection and reminds us that real strength lies not in power, but in compassion, humility, and non-violence.

The most beautiful aspect of this festival is **forgiveness** – expressed through the words “**Micchami Dukkadam**”, which means “**If I have hurt you, knowingly or unknowingly, in any way, I seek your forgiveness.**”

Forgiveness Beyond Boundaries

What makes Paryushan truly special is its universal message. Irrespective of age, caste, or religion, the act of seeking forgiveness connects hearts and dissolves differences. It teaches us that relationships matter more than egos, and peace matters more than pride.

Relevance in Modern Times

In today's corporate and social life, conflicts, misunderstandings, and disagreements are common. The message of Paryushan encourages us to pause, reflect, and make amends. By practicing forgiveness, we not only bring peace to others but also lighten our own hearts.

Conclusion

Paryushan is not limited to a community – it is a celebration of humanity itself. As we bow our heads and say “Micchami Dukkadam”, we rise above divisions and walk towards a more compassionate, forgiving, and peaceful world.

Mr. Bhavik Jain
Legal Head

CORE HIGHLIGHTS

ERP & MIS: Why They Matter More Than You Think

Hi, I'm Aniket, part of the MIS team at Jhamtani. Over the years, I've seen how businesses evolve—and one thing that hasn't changed is the need for clarity, speed, and smart decision-making. That's where ERP and MIS come in, not just as software, but as the silent heroes behind the scenes.

ERP (Enterprise Resource Planning) is like the central nervous system of a company. It connects departments—finance, HR, inventory, sales—so they don't work in isolation. **MIS** (Management Information Systems) is the brain that interprets all that data and helps us make sense of it. Together, they turn chaos into clarity.

Let me give you a simple example. Imagine our inventory team updates stock levels in ERP. That data flows into MIS, which then shows us trends—what's selling, what's stuck, what needs restocking. Suddenly, decisions aren't based on gut feeling—they're backed by real numbers.

At Jhamtani, this integration has helped us reduce errors, improve planning, and respond faster to market changes. It's not just about technology—it's about empowering people with the right information at the right time.

I often say: ERP keeps the business running, MIS keeps it growing.

So if you're still wondering why ERP-MIS matters, think of it this way—would you rather drive with a clear windshield or guess your way through fog? That's the difference it makes.

Mr. Aniket Bhilare
Executive ERP & MIS

7 Future Trends in MEP Engineering

MEP (Mechanical, Electrical, and Plumbing) systems are the backbone of contemporary construction works to make buildings functional, secure, and efficient. In commercial buildings, residential buildings, or industrial developments, MEP construction services make it possible to have proper HVAC systems, electrical connections, and plumbing facilities

Construction's MEP department works hand-in-hand with architects, structural engineers, and contractors to ensure systems integration, compliance with regulatory codes, and maximum building performance. During the modern era of modular building and sustainability, MEP builders make use of Building Information Modeling (BIM) technology, prefab MEP solutions, and modular MEP systems in order to decrease costs, become more energy-efficient, and drive projects faster.

Sustainability & Green MEP Solutions

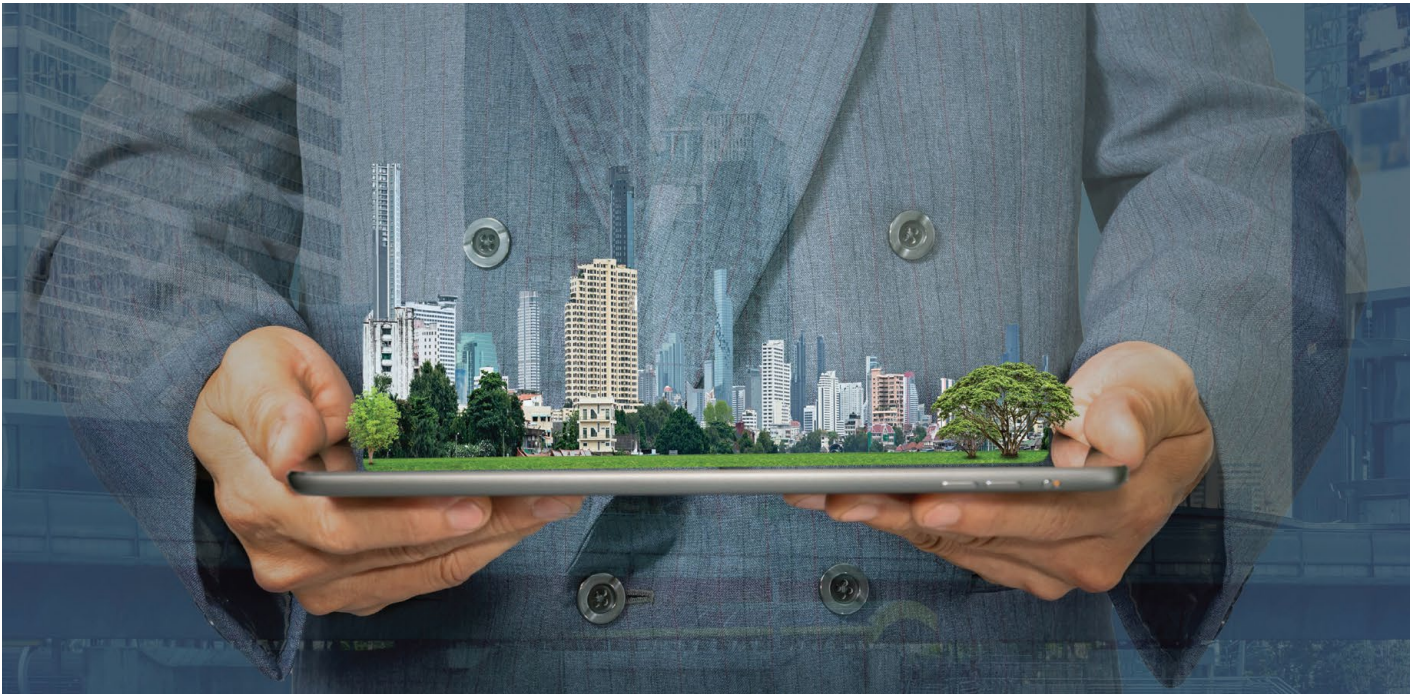

With governments enforcing stricter energy codes, MEP builders are focusing on:

- High-efficiency HVAC systems.
- Solar and wind energy integration.
- Smart water management solutions.

Automation & Smart Buildings

The future of MEP work in construction is smart and data-driven. AI-powered systems:

- Adjust HVAC settings based on real-time occupancy.
- Monitor and detect leaks or system failures automatically.
- Optimize lighting and power consumption using IoT sensors.

Prefab MEP & Modular Construction

MEP modular construction allows systems to be pre-assembled off-site and delivered ready for installation.

Prefab MEP systems reduce labor costs, improve quality control, and accelerate project timelines.

These innovations enhance efficiency while maintaining sustainability and reducing overall project costs.

Use of BIM for MEP Coordination to identify and to resolve design conflicts

By adopting these practices, MEP departments in construction can improve workflow efficiency, reduce project delays, and ensure high-performance buildings.

Conclusion

MEP systems are the lifeblood of today's buildings, providing functionality, efficiency, and sustainability. MEP builders can enhance project outcomes, minimize energy consumption, and save operational expenses through the integration of BIM technology, modular building, and intelligent automation.

The future of MEP construction services is evolving toward smarter, greener, and more cost-effective solutions. Whether through prefab MEP, modular construction, or AI-driven automation, investing in MEP innovation by partnering with a reliable service provider is key to ensuring successful and future-ready building projects.

Mr. Narendra Mahale
Sr. Manager MEP

CORE HIGHLIGHTS

An Unspoken Conversation: A Letter to My Mummy...

Dear Mummy...

It feels strange to write this, but I need to talk to you. Since you left us, my world feels a little dimmer. Every day, I find myself thinking of you, wishing I could just hear your voice one more time. I still play back our last call from June 21st, the day before you were gone. It's like a song stuck in my head... a precious memory I keep close.

My mind is full of memories of us... all the good times, the quiet moments, the big celebrations. I see your smile when I look at old photos, your laugh. How you always made things better. These memories are so special now... they help me feel close to you even though you are not here. I see bits of you everywhere.

It's still so hard to understand. Why did you have to go? I keep searching for answers, but they don't come easy. All I know for sure is that you were a wonderful mummy. You filled my life with so much love and happiness. We all tried our best. I only hope you felt how much we loved you.

Mummy, as my birthday is coming, I feel a deep emptiness for the first time. I'll spend the day without the person who gave me life. I used to wait for your wishes more than anything else, and the silence feels unbearable. Yet I know your love still surrounds me, even if I can't hear your voice.

My love for you will never fade, Mummy... It's a part of me I carry in my heart every day.

Always thinking of you with a heavy heart and endless love,

Yours RANO

Ms. Vishakha Mali
Finance Manager

CORE HIGHLIGHTS

Civil Engineering Responsibilities At Site.

Civil Engineering On A Construction Site Are Primarily Responsible For Overseeing The Construction Process, Ensuring It Aligns With The Project's Design, Budget & Timeline While Also Maintaining Safety Standards. This Includes A Range Of Tasks From Planning & Scheduling To Quality Control & Communication With Various Stakeholders.

Planingng & Scheduling

Developing construction Schedules & Budget.

- Coordinating Work Activities To Ensure Efficient Progress.
- Managing Resources, Including Metrial & Personal.

Quality Control

Ensuring Construction Meets Specifications & Building Codes.

- Conducting Site Inspections To Monitor Progress & Adherence To Safety Protocols.
- verifying Calculation & Placements Of Structures.

Safety Management

- Implementing & Enforcing Safety Procedures.
- Identifying & Mitigating Potential Hazards On Site.
- Ensuring A Safe Working Environment For All Personanel.

Communication & Coordination

- Communication With Architects, Contractor, & Other Stakeholders.
- Preparing & Submitting Report On Project Progress & Status.
- Resolving Any Technical Difficulties Or Problems That Arise.

Material Management

- Estimating & Procuring Necessary Raw Materials, Monitoring Material Usage & Inventory, & Ensuring Materials Are Stored & Handled Properly.

Problem Solving

- Addressing Unexpected Technical Issue & Finding Solutions.
- Adapting To Changing Circumstances & Project Needs.
- Making Informed Decisions Based On Site Condition & Project Requirement.

Documentation:

- Maintaining Accurate Records On Site Activities & Progress.
- Preparing & Submitting Report As Required.
- Filing Necessary Documentation With Local Authorities.

Mr. Vikas Mehtre
Jr. Engineer

Ice-Flake Concrete Innovation in Spacebiz Raft Foundation: Boosting Durability with Temperature Control

In the ever-evolving landscape of construction technology, innovation and quality control are paramount to ensuring the longevity and safety of high-rise structures. At Jhamtani Real Estate Group, we consistently strive for excellence, and our latest Grade 1 commercial project – Jhamtani Spacebiz, a towering 150-meter structure, is a testament to this commitment.

One of the most challenging aspects of this project was the raft foundation – a colossal structure involving over 900 cubic meters of concrete, cast over three consecutive days. To address the complexities of thermal management during mass concrete placement, we designed and implemented an advanced Temperature Controlled Concrete strategy using ice flakes as a critical component.

Why Temperature Control in Mass Concrete Matters

When large volumes of concrete are poured continuously, especially in high ambient temperatures like those in Pune, hydration heat generated from cement can cause thermal gradients. These gradients, if not managed, may lead to:

- **Cracking due to thermal stress**
- **Shrinkage and microstructural weakening**
- **Long-term durability issues**

To overcome this, maintaining an optimal core temperature (typically below 70°C) and

minimizing the temperature differential between the core and surface (<20°C) is essential.

Use of Ice Flakes in Temperature Controlled Concrete

To manage the internal temperature rise, we adopted the innovative method of adding ice flakes directly into the concrete mix, replacing a part of the mixing water.

Key aspects of the process:

Crushed ice flakes were introduced at the batching plant in the early morning hours to reduce initial concrete temperature.

- Ice contributed to instant heat absorption during melting, reducing peak hydration temperatures.
- Mix design was adjusted to account for water contributed by melted ice, ensuring W/C ratio compliance.
- Continuous temperature monitoring using embedded sensors ensured thermal differentials were within permissible limits throughout the 3-day casting process.

Advantages of Ice Flake-Based Temperature Control

1. Reduction of Peak Concrete Temperature:

The ice flakes brought the fresh concrete temperature down to 21–23°C, significantly lower than ambient conditions (~32–34°C).

2. Minimization of Thermal Cracks:

Controlled heat of hydration prevented thermal shock and cracking, especially critical in a raft of such depth and volume.

3. Improved Structural Integrity:

Reduced early-age cracking has a direct impact on long-term performance and load-bearing capacity of the structure.

4. Enhanced Durability:

The minimized thermal damage and controlled setting improved the microstructure and impermeability, ensuring resistance to sulphate, chloride, and other environmental attacks.

5. Smoother Construction Workflow:

Ice flakes provided a practical solution without the need for external chilling systems or delayed casting, ensuring project timelines were maintained.

Monitoring and Quality Assurance

To ensure the success of this strategy, our QA/QC team implemented:

Digital temperature loggers embedded in core and surface zones of the raft.

Daily thermal mapping and analysis during the 72-hour casting window.

Comprehensive testing of cube strength, shrinkage, and thermal expansion at various intervals.

Continuous on-site supervision to ensure adherence to planned ice dosing and mixing procedures.

Impact on Project and Industry Practices

The successful implementation of temperature-controlled concrete using ice flakes in Jhamtani Spacebiz has set a benchmark for mass concrete pours in high-rise commercial

construction. Not only has this ensured long-term durability, but it has also enhanced our team's understanding of thermal behavior in tropical construction environments.

This technique will now be considered a standard practice for large raft foundations and high-volume pours within Jhamtani Real Estate Group, especially during summer or for heavily reinforced sections.

Conclusion

Temperature control in mass concrete is not just a technical formality—it is a structural necessity. By integrating ice flake technology into our concrete mix design, we have not only mitigated the risks of thermal cracking but have also significantly enhanced the lifespan and reliability of a critical structural component.

As we continue to build vertical landmarks, quality and innovation will remain the cornerstone of our construction philosophy.

Mr. Narendra Gosavi
Senior Manager Quality
