Editor's Note

Hello JTribe,

September has been an extraordinary month, a true embodiment of the energy and ambition that defines our organization! We're thrilled to share the highlights that have propelled us forward and reinforced the bonds within our incredible team.

A New Chapter of Abundance

The month was dominated by the highly anticipated launch of our flagship project, Ace Abundance in Mundhwa. Ace Abundance is a perfect blend of modern sophisticated living in the high-end setting of Mundhwa, offering 3 and 4.5BHK homes with 40+ lifestyle amenities

The response has been phenomenal, a testament to the meticulous planning and innovative design our teams poured into this venture. The grand launch marked a significant milestone, setting a new benchmark for luxury and strategic location in Pune's dynamic real estate landscape.

Leading up to this success, we hosted a crucial Business Associates Meet at Hotel Westin, Koregaon Park, dedicated to unveiling Ace Abundance. This event was not just a project showcase; it was an exercise in partnership and shared vision. We were delighted to collaborate with our valued partners, ensuring they are fully equipped to represent this project and, in turn, share in its success. The overwhelming enthusiasm from the channel partners is a strong indicator of the market's positive reception to what Ace Abundance offers.

Rooted in Our Core Philosophy

These successes are a direct reflection of our core values and philosophy. At Jhamtani, we are guided by the 3 E's: Excellence, Environment, and Ethics, which are further cemented by our core values of Integrity, Innovation, Customer First, Excellence,

Dynamism, and Ethical Practice Always. From the drawing board of Ace Abundance to the execution on the ground, these principles ensure that we don't just build structures, but trusted homes and thriving communities that enhance the lives of our customers. This unwavering commitment to quality and integrity is the bedrock of the trust we've built over the years.

Celebrating Our Tribe

Beyond the milestones in business, September was also a time to reconnect and recharge. The entire JTribe team came together for a fantastic picnic to Anjavel Agro Tourism. It was a much-needed break from the office, filled with vibrant team building activities, fun, and bonding. From friendly competitions to shared laughter, the day truly highlighted the collaborative spirit and strong camaraderie that makes our team so unique and effective. When we strengthen our internal bonds, we naturally enhance our ability to deliver excellence externally.

As we move into the next quarter, let us carry the momentum of Ace Abundance and the spirit of teamwork forward. I look forward to achieving even greater heights with all of you!

Thankyou

Meenakshi Jhamtani

Executive Director

A Return to the Roots

The 2025 Annual Team Retreat

The pace of modern business demands relentless focus and high-intensity collaboration.

Recognizing the critical need to balance this intensity with intentional rest and cultural reinforcement, J Tribe executed its highly anticipated annual team picnic on September 19, 2025. Far exceeding the scope of a simple company outing, the retreat was a strategic investment in the well-being and operational synergy of our most valuable asset: our people.

This year, the team gathered at **Anjanvel Agri Tourism** in the picturesque, tranquil setting of Shilimb. The decision to select an agri-tourism venue was a deliberate choice to shift the focus from the corporate structure to personal connection, cultural grounding, and team resilience. The retreat was an overwhelming success, achieving its primary objective of fostering deeper professional bonds that will continue to drive performance and innovation across all our business units.

The Canvas of Collaboration: Anjanvel Agri Tourism

The destination itself played a pivotal role in the retreat's success. Nestled amidst the majestic *Sahyadri hills* and overlooking the serene backwaters of the Pawna Dam region, Anjanvel provided a pristine and restorative backdrop. This environment allowed the team to completely unplug from their digital routines and engage meaningfully with their colleagues.

The atmosphere cultivated an effortless transition from the formal office environment to one of mutual discovery. The natural beauty of the location served as a powerful reminder of the value of perspective and tranquility—essential elements for maintaining mental clarity and strategic thinking.

The Agenda: Maximizing Engagement and Well-being

The day was meticulously structured to ensure a perfect balance of activity and relaxation,

designed to encourage cross-functional interaction without imposing a rigid corporate structure:

Cross-Functional Team Building & Adventure

The morning commenced with organized activities that focused on collaborative problem-solving and friendly competition. Groups were intentionally mixed across departments (from Operations to Sales to Administration) to foster new lines of communication.

Culinary & Cultural Integration: The Heart of the Retreat

The communal dining experience was arguably the centerpiece of the entire event. Moving away from standard catering, the team was treated to an authentic spread of fresh, *home-cooked Maharashtrian cuisine*.

The shared experience of enjoying local flavors prepared with farm-fresh ingredients reinforced a strong sense of community. It celebrated simplicity and tradition, reminding everyone of the essential, shared human connection that underpins professional life. The collective energy during the meal was palpable, demonstrating the positive impact of breaking bread together in a relaxed setting.

Management Reflection and The Path Ahead

The success of the 2025 Annual Picnic underscores J Tribe's foundational belief that a cohesive team is a successful team. The shared experience has translated into a visible uplift in morale and collaborative readiness.

The energy and genuine connection we witnessed at Anjanvel are precisely what fuels our innovation," commented [Hypothetical Name], Head of Operations. "This retreat was a vital investment. We've given our team the space to recharge and build stronger personal bonds, which will undoubtedly translate into better cross-functional support and sharper execution in the coming year.

The retreat provided a moment to celebrate the hard-earned achievements of the past year and to align vision for the future. The connections forged in the serene hills of Shilimb are expected to drive seamless communication and enhanced project delivery in the months to come.

J Tribe's commitment to fostering a vibrant, supportive, and engaged professional community remains paramount. We look forward to carrying the renewed energy and unified spirit gained at Anjanvel into a highly successful Q4 and beyond.

Mr. Shubham Sonawane
Asst. Manager - ADMIN

Jhamtani Unveils Ace Abundance XO Series with Grand Launch & 360° Media Outreach

Jhamtani Group, a name synonymous with trust, quality, and innovation in Pune's real estate landscape, has officially unveiled its latest masterpiece – Ace Abundance – XO Series, in the vibrant and well-connected locale of Mundhwa, Pune.

The launch marked a significant milestone for the brand, featuring grand celebrations and an exclusive Channel Partner Meet, attended by select partners from across the city. The event showcased Jhamtani's commitment to excellence and collaboration, setting the tone for an exciting new chapter of success.

Adding to the grandeur, the launch campaign was amplified through an extensive 360° media coverage, spanning print, digital, outdoor, and social platforms – reinforcing Jhamtani's strong brand presence and customer connect across Pune's East and West markets.

Redefining Urban Luxury Living

Strategically located with seamless access to Koregaon Park, Kalyani Nagar, Viman Nagar, Hadapsar, and Kharadi, Ace Abundance stands as a testament to urban sophistication. The project redefines luxury living through a thoughtful blend of design, functionality, and comfort.

Offering limited 3, 4, and 4.5 BHK residences starting at ₹1.91 Cr, every home at Ace Abundance is meticulously crafted – combining modern architecture with functional layouts, abundant natural light, and intelligent space utilization.

Beyond the residences lies an indulgent world of lifestyle amenities – including an expansive clubhouse, themed landscaped gardens, wellness and fitness zones, sky decks, and smart home features. Every element is designed to offer residents an unparalleled experience of comfort, convenience, and sophistication.

A Legacy of Trust and Excellence

With its launch, Jhamtani Group once again reinforces its legacy of creating landmark developments that inspire trust and admiration. Situated in one of Pune's most thriving corridors, Mundhwa offers a perfect balance of connectivity, lifestyle, and growth potential – making Ace Abundance an address of true prestige.

The exclusive launch period presents discerning homebuyers with a rare opportunity to own one of Pune's finest residences and avail special introductory offers.

A Celebration of Abundance

Ace Abundance – XO Series is not just a home; it's a statement of extraordinary living. It represents the spirit of abundance – where elegance meets convenience, and every experience is crafted for those who aspire to live exceptionally.

Mr. Dhaval Thakkar
GM - Sales East

CORE HIGHLIGHTS

Ace Abundance: Setting a New Benchmark in Ultra-Luxury Living

On **5th September 2025**, Jhamtani Realty hosted an insightful presentation for its flagship project, **Ace Abundance**, under the **XO Signature Series**, bringing together the entire Jhamtani team – Sales, Marketing, CRM, Admin, Liaisoning, Pre-Sales, and IT. The session, led by **Ms. Meenakshi Jhamtani**, **Mr. Manoj Kulkarni** and **Ar. Ashish Tarode**, showcased every facet of the project – from location advantages and architectural design to world-class amenities and premium specifications.

Unveiling Ace Abundance – A Luxury Landmark in Mundhwa

Located strategically at **Mundhwa, Pune**, Ace Abundance spans 1.73 acres (approx. 75,348 sq.ft.), featuring 160 ultra-luxurious residences across two premium towers:

- **4 BHK residences** (1800-1927 sq.ft.)
- **3 BHK residences** (1293-1307 sq.ft.)
- Exclusive **Sky Villas** on the 21st & 22nd floors.

The project comes with 2-level basement parking, offering 236 car parks, and is designed as a RERA-registered development, with possession

slated for March 31, 2030 and construction completion by December 2028.

A Prime Location Surrounded by the Best

Ace Abundance is positioned in the heart of Pune's upscale eastern corridor, surrounded by iconic neighborhoods like Kalyani Nagar, Koregaon Park, Amanora Park Town, and Magarpatta City. Major connectivity highlights include:

- **Kalyani Nagar Metro Station – 1.8 km**
- **Hadapsar Railway Station – nearby**

The project stands amidst elite developments like Godrej Skyline, Supreme Towers, and Bluegrass

Residences, ensuring unmatched lifestyle and investment value.

Defining XO – The Signature Series

Ace Abundance is more than a home; it's a statement. The XO Signature Series focuses on:

- **Premium Architecture & Interiors:** Italian marble flooring, laminated wooden flooring in master bedrooms, and Artize/Jaguar fittings.
- **Advanced Living Features:** Honeywell home automation, Panasonic VDP, EV charging points, and 100% DG backup.
- **Design Excellence:** Ceiling in balconies, wall-to-wall windows for maximum natural light, and thoughtfully curated layouts.

Luxury Beyond Four Walls – 45+ World-Class Amenities

The project boasts an amenity spread of 31,860 sq.ft. across three levels:

- **Ground Level:** Amphitheatre, outdoor movie wall, kids' play zone, meditation spaces, and senior citizen seating.
- **12th Floor Recreational Deck:** AC Gym, Zumba & Yoga Studio, Salt Room, Sauna & Steam Rooms, Podcast Room, Game Zone, Co-working Spaces, and a Multipurpose Hall for 45 guests.
- **Terrace Level:** Infinity Pool with underwater lounge chairs, Pickleball Court, Outdoor Spa, Café Lounge, Yoga & Meditation Zones, and Private Seating Pods.

These amenities cater to every age group and modern lifestyle need, blending wellness, entertainment, and community engagement.

Engaging Q&A – Addressing Real Queries

The session witnessed interactive discussions on topics like balcony enclosure rules, loading factor explanation, legal process for duplex registration, Vastu compliance, and operations of amenities.

The leadership team, along with experts like Aniket (Sales) and Adv. Ram, provided clear, practical answers ensuring team clarity.

Launch Strategy – Mark the Dates

- **Pre-booking Opens:** 15th September 2025
- **Grand Launch:** 2nd October 2025 (Dussehra)

As Mr. Anup Jhamtani, MD of Jhamtani Realty, concluded,

“Ace Abundance will redefine ultra-luxury living in Pune. With its exceptional design, premium finishes, and curated lifestyle, this project is set to become a benchmark for opulence in the East Pune real estate market.”

With **premium specifications, sustainable planning, and competitive positioning against leading luxury developers**, Ace Abundance promises to deliver **plenty of space, plenty of light, and plenty of luxury** – truly living up to its name.

Mr. Ashish Tarode
General Manager Projects

Staying Relevant in an Ever-Changing World: An Architect's Perspective

The world is evolving—fast. From climate shifts and urban migration to digital revolutions and changing lifestyles, every aspect of how we live, work, and interact with space is in transformation. For architects, this is both a challenge and an incredible opportunity. The question is: how do we stay relevant in such a fast-paced, ever-changing landscape?

Working in the real estate sector gives architects a unique lens. We're not only designing buildings—we're interpreting policies, decoding trends, navigating new technologies, and responding to evolving human needs. Government schemes like PMAY (Pradhan Mantri Awas Yojana) have pushed us to think more economically and inclusively, while urban policies such as UDCPR have reshaped how we approach FSI, height

restrictions, and mixed-use development. This convergence of design and governance is redefining our role.

Design trends in 2025 reflect this shift. There's a growing demand for biophilic design, where nature is seamlessly integrated into our spaces through indoor courtyards, vertical gardens, and natural ventilation. Smart architecture—including automated lighting, adaptive facades, and energy management systems—is now a standard expectation. Tools like parametric design software and AI-based design assistance are helping architects visualize and simulate projects with astonishing accuracy. We're moving from form-following-function to form - responding - to-data.

discussing compliance documentation. Every site visit or client meeting holds a hidden lesson.

Document & Reflect: Maintain a personal archive—photos, sketches, PDFs of policies, and design notes. You'll be surprised how often a past insight becomes the key to a current problem.

As architects, our relevance isn't defined by how trendy our designs look—it's defined by how effectively we respond to context, community, climate, and policy.

Being relevant is about staying curious. It's about adapting, exploring, and never assuming we know enough. In the end, architecture is not just about what we build—it's about how we think.

So as the world around us changes, let us evolve with it—one habit, one project, and one design decision at a time.

Yet, staying on top of these trends doesn't require a complete overhaul of our daily lives. It's about building simple, smart habits.

Here are a few practical steps that can make a lasting impact:

Daily Knowledge Doses: Set aside just 15–20 minutes each day to read industry updates. Follow platforms like ArchDaily, Dezeen, COA, or even the LinkedIn pages of local authorities for design news, regulatory changes, and inspiration.

Monthly Learning Goals: Aim to attend at least one webinar, workshop, or IGBC/EC policy briefing session every month. Many of these are available online and can be done during commute hours or breaks.

Collaborate & Converse: Don't underestimate the learning that comes from talking to consultants—whether it's a structural engineer explaining load distribution or an EC consultant

Ms. Sneha Nenwani
Architect - Liaisoning

CORE HIGHLIGHTS

Engineer's Day A Tribute to Builders of the Nation

Every year on **15th September**, India celebrates **Engineer's Day** to honor **Bharat Ratna Sir Mokshagundam Visvesvaraya** (1861–1962) – a legendary civil engineer, statesman, and visionary. He is remembered for his outstanding contribution to modern engineering and his role in nation-building.

Sir Visvesvaraya was the chief engineer behind many iconic projects such as the Krishna Raja Sagara Dam in Mysore and advanced flood protection systems in Hyderabad. His vision of combining engineering excellence with social responsibility still inspires millions of professionals today.

Importance of Engineer's Day

Engineer's Day is not only a tribute to one man

but also a celebration of the entire engineering community. Engineers are the backbone of progress – they design cities, connect nations, create industries, and even explore outer space.

Why Engineers are Important?

- They transform ideas into reality.
- They develop infrastructure for growth – roads, bridges, dams, and buildings.
- They innovate in technology, IT, communication, and automation.
- They ensure safety, sustainability, and efficiency in every project.
- They play a key role in nation-building and economic growth.

Qualities of a Great Engineer

- Creativity & Innovation – thinking beyond boundaries.
- Problem-Solving Attitude – finding solutions to toughest challenges.
- Teamwork & Leadership – working together for success.
- Sustainability & Responsibility – ensuring safety of people and environment.
- Continuous Learning – upgrading with new technologies.

Message for Today's Engineers

As engineers, our duty is not just to build, but to build with vision, precision, and compassion. Every drawing, every calculation, every design should serve humanity and future generations.

Let us remember the words often associated with Sir Visvesvaraya:

Work is Worship. Hard work and discipline are the real keys to success.

Conclusion

Engineer's Day reminds us that science discovers, but engineering creates. Engineers are the architects of the modern world – from smartphones to satellites, from skyscrapers to smart cities.

On this special day, let us salute every engineer who works tirelessly to build a better tomorrow.

Mr. Vikas Mehtre
Jr. Engineer

CORE HIGHLIGHTS

Aluform (Aluminium Formwork System)

Aluform, also known as the Aluminium Formwork System, is a modern construction technology that uses lightweight aluminium panels to cast concrete structures – including walls, slabs, columns, beams, stairs, and other components –

in a single pour. It provides a fast, accurate, and durable method of constructing reinforced concrete buildings, particularly high-rise residential and commercial structures.

History and Development

The Aluform system was first developed in the 1970s by a company called Mivan Company Ltd. in Europe (hence sometimes called Mivan Shuttering). Over time, the system gained popularity in India, Malaysia, Singapore, and the Middle East, mainly due to its speed, quality, and reusability.

Components of Aluform

The Aluform system consists of several prefabricated aluminium panels and accessories:

Wall Panels: For casting vertical concrete surfaces.

Deck Panels: For slab casting.

Beam Soffit and Beam Side Panels: To form beam structures.

Prop Heads and Props: To support slabs temporarily.

Pins and Wedges: For joining panels together.

Kickers and Stop Ends: For alignment and boundary control.

Wall Ties: To maintain wall thickness and alignment.

Construction Process

- 1. Setting Out and Layout:** Marking grid lines and reference levels.
- 2. Fixing Wall Panels:** Positioning and aligning panels according to drawings.
- 3. Placing Reinforcement and Services:** Steel bars, conduits, and sleeves are placed.
- 4. Fixing Deck and Beam Panels:** Decks and beams are placed to complete the formwork.
- 5. Concreting:** Concrete is poured monolithically for walls and slabs together.
- 6. De-shuttering:** Panels are removed after 24–36 hours (depending on curing and temperature).
- 7. Repetition:** Panels are cleaned, oiled, and reused for the next cycle.

Advantages

Speed: Enables one floor cycle in 4–5 days, saving time.

Quality Finish: Smooth concrete surface reduces plastering needs.

Durability: Aluminium panels can be reused over 200 times.

Accuracy: Ensures precise dimensions and alignment.

Less Skilled Labor Required: Assembly is simpler than traditional formwork.

Monolithic Construction: No joints between wall and slab, improving strength and leak resistance.

Disadvantages

High Initial Cost: Costly formwork setup and design.

Limited Flexibility: Difficult to modify layout or design once panels are fabricated.

Maintenance: Panels can be damaged by mishandling.

Skilled Supervision Required: Requires accurate planning and quality control.

Comparison with Conventional Formwork

Mr. Tanmay Badhe
Jr. Engineer - Ace Atmosphere

CORE HIGHLIGHTS

Why is a Safety Officer needed?

Having a licensed safety officer on a construction site is necessary for several reasons:

1. Compliance with Regulations:

Construction sites are subject to numerous regulations and safety standards set forth by local, state, and federal governments. A licensed safety officer ensures that the site is compliant with these regulations, reducing the risk of fines and legal penalties.

2. Risk Management:

Construction sites pose numerous hazards, including falls, electrical hazards, hazardous materials, and machinery accidents. A safety officer identifies these risks and implements measures to mitigate them, reducing the likelihood of accidents and injuries.

3. Worker Safety:

The primary responsibility of a safety officer is to ensure the safety and well-being of workers on the construction site. He conducts safety training, enforces safety protocols, and performs regular inspections to identify and address potential hazards.

4. Prevention of Accidents:

Accidents on construction sites can result in injuries, fatalities, property damage, and project delays. By proactively identifying and addressing safety hazards, a licensed safety officer helps prevent accidents from occurring in the first place.

5. Enhanced Productivity:

A safe working environment is essential for productivity on a construction site. When workers feel safe and confident in their surroundings, they can focus on their tasks without worrying about potential hazards or accidents.

6. Liability Reduction:

Employing a licensed safety officer demonstrates a commitment to safety, which can help reduce liability in the event of an accident or injury. It shows that the employer has taken reasonable steps to ensure a safe work environment.

7. Emergency Preparedness:

Safety officers are trained to respond to emergencies such as fires, chemical spills, or medical emergencies. Their presence ensures that appropriate emergency procedures are in place and that workers know what to do in case of an emergency.

Mr. Dilip Divaskar
Safety Officer
